Setting up the Hydro, Coal and Gas-Based Power Plants

645. SHRI VIJAY J. DARDA: Will the Minister of POWER be pleased to state:

(a) how many power plants, hydro, coal and gas-based are proposed to be set up in the Tenth Plan Period and how much power generation would result year-wise from 2005 onwards;

(b) what is the quantum of shortage of power in India State-wise and when will it be possible to provide requisite power to our farmers, rural or semi-urban small industries, cold storages, etc. with a view to increasing income of rural and tribal people; and

(c) what is the perspective planning for another two decades for proceeding towards generating power to meet all our requirements and what are the details thereof?

THE MINISTER OF POWER (SHRI P.M. SAYEED): (a) A generation capacity addition target of 41,110 MW comprising 14393 MW hydro, 25417 MW thermal (20553 MW coal, 4750 MW gas, 114 MW diesel) and 1300 MW nuclear has been envisaged for benefits during 10th Plan. The peak availability at the end of 10th Plan is estimated to be 101428 MW and the energy availability at the end of 10th Plan is expected to be 623252 million units.

(b) The present shortages in the peak demand is 10% and energy shortage is 6.3%. State-wise details of present peak shortages are in the Statement *(See* below) and energy shortages are in the statement (See below). Prevailing shortages are likely to be completely bridged by end of 11th Plan *i.e.* 2011-12.

(c) A capacity addition of over 1,00,000 MW have been targeted during 10th & 11 th Plans to meet country's total requirement of power. Of this a capacity addition of 41,110 MW has been targeted for 10th Five Year Plan and another 60,000 MW is being targeted to be added in 11th Five Year Plan. In addition perspective plan has been drawn up to create shelf of projects under 50,000 MW Hydro initiative and 1,00,000 MW Thermal initiative, which could be taken up for execution from 11th Plan and beyond.

Statement-I

State-wise details of Present Peak Shortage and Peak demand/Peak Met (April-November, 2004)

(in MW)
